

*Sherman Cases*

**460 Different Sizes**

**All Rotomolded,  
Interlocking and  
Stackable**

**Stainless Steel**

**Blackened Hardware**

## SC Series Cases

Sherman rotomolded cases have been made to withstand the toughest environmental and climate conditions. Each case is manufactured as a solid uniform structure which makes it extra resistant to impact and vibration enabling the case to be handled and transported in extreme situations. It is constructed from virgin raw polymer resin, which is UV resistant and is specifically designed to function in extreme temperatures under a high solar load.

These cases are ideal for electronics, memory storage equipment, servers, lab and testing equipment, medical equipment, aerospace equipment, broadcasting equipment, meteorological equipment, flight simulators, satellite communications, radars and mobile military equipment.

The **SC SERIES** includes 460 different sizes with many color options. Once placed in a Sherman case, your delicate equipment and instruments are transported and used under complete protection from shock, vibration, moisture and impact. Your cases come furnished with the appropriate grade foam and/or shock mounting equipment in line with your special project requirements.

# 2 Year Warranty on Case and Accessories

## SHERMAN ROTOMOLDED CASES 2 YEAR LIMITED WARRANTY

Sherman Cases guarantees its rotationally molded products will be free of defects in materials and workmanship for two

years from the date of invoice. This warranty covers all associated hardware including closure hardware, handles, wheels,

and fasteners. With valid dated proof of purchase, Sherman Case will either repair or replace any defective product, at our sole option.
